

## NEWS RELEASE

KIRMUSSAUDIO

Denver, Colorado, USA February 14 2019

For decades, Audiophiles and Record Custodians alike have longed for something to not just surface clean their vinyl or lacquered records but see contaminants removed from within the record's grooves so they'll be able to hear music as it was intended to be heard. Charles Kirmuss, Owner and Founder of Kirmuss and Associates, LLC. has developed a new patented and patents pending technology that is intended to meet that need - and his invention has been receiving accolades from around the world. We are humbled by both the Reviews received as well as by the comments from Audiophiles around the globe.

On the occasion of the MONTREAL AUDIO FEST 2019 and AXPONA 2019 will see us start our second business year. We take this opportunity to EXPRESS THE LOVE and wish to thank everyone for the success we had last year. Close to One Million Dollars of Restoration Systems were sold to North American Audiophiles alone in just 7 months. We are all custodians of our records. **"LET'S KEEP THE RECORDS SPINNING!"** Thank you for your continued patronage and comments. Many new accessories coming this year. Stay Tuned!  
*Sincerely, The entire KirmussAudio Global Team.*

### ***In the Global Audiophile Medias...***

"I have to declare that the KARC-1 is the best record cleaner on the market. Bar none."

*...Paul Rigby, HiFi World, January 2019, Great Britain*

"Over the past five decades I have used many DIY and professional cleaning systems....none of those systems have come close to the sonic benefits I am experiencing with this system, ...it is like opening a window, ...simply dramatic."

*...Lowell E. Graham, President: American Bandmasters Association,  
President and CEO: John Philip Sousa Foundation*

"The Kirmuss system should not be seen as simply a record cleaning machine, it is a professional grade archival system that has been made affordable to anyone wanting to preserve or restore their vinyl collection and as such thoroughly deserves HiFi Pig's Outstanding Product award."

*...Lynette Smith, Hi-Fi Pig, January 2019, Great Britain*

"The KirmussAudio Ultimate Ultrasonic Vinyl Restoration System" works great. It takes longer to clean the records than with a standard brush machine, but then again it works completely contact-free. And the necessary "after-treatment" of the discs satisfies the analog desire to play. Huge Recommendation"

*...Matthias Böde, German Stereo de, October 2018*

"I am a pioneer trying to better the art of reproduction, in that light the importance of the cleaner can't be overstated! WOW! WOW! WOW!"

*...Frans Muys van de Moer, Inventor, Member Netherlands' band : "Ekseption"*

"Most significant product introduction: Best Analog Product AXPONA 2018."

*...Andre Jennings, "THE Absolute Sound", July/August 2018 edition*
